PROFILE

I'm a reliable, enthusiastic and hard working individual who enjoys learning new skills and being set a challenge. I always complete tasks to the very best of my ability, and use my own initiative to find work when needed. I confidently work well on my own or as part of a team.

KEY SKILLS

- Excellent knowledge of ES6, Angular, HTML 5, CSS3, SASS, Bootstrap
- Advanced Knowledge of React, Typescript, NGRX, RXJS and web accessibility
- Good Knowledge of C#, .net Core, MSSQL, and MongoDB
- Spends plenty of time in the evening coding hobby projects and general learning to stay up to date
- Writes clean organised code

EMPLOYMENT

Ten Lifestyle Group

Sep 2018 – Present

Front End Tech Lead

- Working on a multi-tenant and multi-lingual platform with clients such as Coutts, Mastercard and Visa
- Contributing on a green-field internal CRM project
- Proposing and building a tool to improve how client sites are managed and built, freeing the developers from this work which allows the business to achieve more
- Day to day management of a team of 8 developers working on multiple 2 week sprints. (BAU and other key feature sprints)
- Hands on development, code reviews and coaching the team to ensure we deliver the highest quality of code
- Working closely with PM/SMs to manage project risks and ensure we deliver on time.
- Creating technical specifications, coding standards and other project documentation as required.
- Collaborating on key technical decisions with the wider team (PM, BA, QA, Back-end, Dev-Ops, Architect)
- Skills used: Angular 12+, NGRX, RXJS, SCSS, Typescript, Node.js, NestJS, MongoDB, React

Sparfax

Aug 2016 – Aug 2018

Senior Front End Developer

- Single-handedly overhauled front end of core white label product, bringing all clients and features under one codebase. This improvement was pivotal to the success of the product and allowed Spafax to take on many more clients than would have been possible beforehand.
- Continuing on with improvements of the core product I was part of a team effort to replace AngularJS with React JS.
- Conducting code reviews, contributing to coding standards documentation.
- Skills / tools used: React JS, AngularJS, ES6, Typescript, SASS, Bootstrap, Grunt/Gulp/Webpack, Umbraco, Razor, C#, VSTS
- Working in an Agile Environment, using Jira

Lowcostholidays

Jan 2016 – July 2016

- Interviewing for Developers
- Project planning and estimation
- Creating and enforcing coding standards
- Reviewing code and giving feedback if improvements are required and why
- Mentoring/Helping developers
- Managing the team and workload to work efficiently and complete work on time.
- Same tasks as below.

Lowcostholidays

Jun 2014 – Jan 2016

Senior Front End Developer

- Front End Lead for rebuilding Lowcostholidays new travel website from scratch using HTML5, SASS, Bootstrap, AngularJS, Javascript ES5, C#, Asp.net MVC, MongoDB, Qunit
- Mentoring/Helping other developers to solve Front End issues
- Working in an Agile Environment, weekly sprints using Jira, taking on the role as Scrum master occasionally
- Cross Browser(IE9+) / Device Compatibility
- Ensuring pages respond and load quickly on desktop and mobile networks
- Communicating with BA's and PM's to ensure work is completed correctly and on time
- Solving Issues and putting forward ideas to improve user experience.

RJmetis

Apr 2011 – Jun 2014

Web/UX Designer & Senior Front End Developer

- Coding pixel perfect web pages using HTML 5, CSS, Bootstrap, SASS and JQuery
- Communicating with backend developers so the right controls are used and any html created is not in tables.
- Estimating work and ensuring deadlines are met
- Building WordPress Themes & Plugins
- Managing and maintaining all online Websites.
- Cross browser compatibility
- Search Engine Optimisation
- Solving Issues and putting forward ideas to improve user experience.
